Subject: Re: LPRSA - Bioaccumulation Modeling Topics - Clarification needed

I have asked John Toll to elaborate and will get that to ASAP.

Rob,

It would be helpful if the CPG could clarify what in particular they would like to discuss about the following items (listed below) from the 6/29 bioaccumulation model meeting agenda you provided. Providing us with this information in advance of the meeting will help us better prepare for the meeting with the goal of having a more productive conversation about these topics.

- Temporal averaging and model linkage concerns;
- Benthic-biomass analysis concerns and impacts on food web assumptions;
- BSAF predictions for benthos being too high;
- Recalibration of their model to a spatial gradient;
- Trophic guild comments and feeding preferences setup;
- Carp ventilation exposure pathway; and
- Modeling remediation alternatives with alternative parameterizations given model and data uncertainties.

Thanks,
Jennifer LaPoma
